

LOUVRE GARAGE DOORS

Steel-Line's aluminium Louvre sectional garage door has been developed to give a high level of airflow and natural light transmission.

Steel-Line sets a new benchmark for Louvre garage doors. Designed and manufactured in Australia, our Louvre garage door is extremely strong and secure with a modern architectural look. Its ability to provide privacy for what is inside and still allow a minimum 22% ventilation, makes this the door of choice for many modern developments. The aluminium Louvre panels allow diffused natural light transfer into your garage whilst avoiding direct sunlight.

Steel-Line's stylish Louvre garage door can create a look that will complement the front of your home and give it more street appeal. There are numerous sizes and colours to choose from, and we can even custom built a Louvre garage door to suit your individual project needs.

LOUVRE GARAGE DOORS

In high wind or cyclonic locations, Steel-Line wind rated Louvre garage doors are widely used due to its superior strength and rigidity.

Stringently tested to meet wind load requirements

Steel-Line Louvre garage doors have been engineered to the highest standard and tested at the JCU Cyclone Testing Station against the wind loading requirements of AS/NZS 4505-2012.

Designed for strength and safety

The wind rated Louvre garage door uses the proven wind brace post system developed for the standard range of wind rated Steel-Line sectional garage doors.

The Wind Brace design features a removable steel wind brace post or posts (dependant on door width) that is installed to the garage door once a cyclone warning is received. It takes about 2-5 minutes to install, and no tools are required. This feature allows the door to achieve a maximum C3 wind rating for wind region C and D in Australia.

Various design options to meet size and wind load requirements

LOUVRE GARAGE DOOR	WIND CLASSIFICATION	MAX DOOR HEIGHT (MM)	MAX DOOR WIDTH (MM)
Standard Louvre Door	N/A	3600	6500
Wind Rated Wind Brace Louvre Door	C2, C3	3000	6000
